

# Advice for patients before and during cancer treatment

## Information for patients

Due to the recent national increase in COVID-19 positive cases, we would advise you, your household members, and anyone in your support bubble to:

- not mix with other households, or bubbles in private homes or gardens.
- not meet people outside your household or bubble in any setting, e.g. bar, shop or leisure facility - indoors or outdoors.
- maintain two metres social distancing at all times with anyone outside your household or support bubble

Following the above recommendations will help to reduce the risk of contracting COVID-19 which may result in your cancer treatment being delayed.

Please also follow any additional specific advice given to you by the government, your local council, and the staff who are delivering your treatment.
