

Your Clinical Nurse Specialist (CNS)

Information for patients

Your CNS provides a point of contact when you need to know where to go for support, advice or information.

How can we help you?

By giving you

- An opportunity to discuss and ask questions about the information you have been given.
- Support for you and your family during the investigations, treatment, diagnosis and management of your tumour.
- A link between you and the other healthcare professionals involved in your care.
- Time to discuss your concerns in order that we can address these with you; this is called a personalised care plan. This may involve signposting you to other services for their help and support.

How to contact us

Roisin Darley
