

**The Leeds
Teaching Hospitals**
NHS Trust

Endoscopy Unit

Following a Colonoscopy: No sedation

Discharge advice
for patients

Patient's Name:

Hospital Number:

Your bowels may feel painful and distended, this is caused by the air we put in your bowel. This is normal and should pass off without treatment. Some spotting of blood is also common after the procedure and should settle within 24 hours.

If you feel unwell after your procedure and have worsening abdominal pain, vomiting, bleeding from the back passage that does not stop or gets worse, or any other worries, please contact the Endoscopy Unit where you had your procedure. The numbers can be found at the end of this leaflet. The Endoscopy Units are open from 8.30 am to 6.00 pm, Monday to Friday (excluding bank holidays).

If you are unwell and need advice when the Endoscopy Units are closed, we advise that you:

- attend the Emergency department if you think you require **immediate** medical attention; and
- contact the gastro registrar on call for further advice.

To contact the gastro registrar on call you should: ring the hospital switchboard on **0113 2433144** and then ask for the gastro registrar on call on **bleep 4770**. You may have to wait a few minutes until the call is connected.

Here is some additional information your GP may find helpful if the need arises:

Tissue sample taken: Yes No

Polypectomy: Yes No

Treatment carried out:

Follow-up care: Any enquires regarding your outpatient appointment should be directed to your consultant's secretary.
