

# What happens after your examination

## Information for patients

The mammogram/ultrasound scan that you have just received will be reported by a Consultant Radiologist. On some occasions further investigations are required to help with the diagnosis. If this is necessary you will be contacted by telephone or letter for a further appointment.

Your result letter will be generated via the breast secretaries who will forward your results within 3 to 6 weeks.

**If you have not received your results please contact the Breast Secretaries (0113) 206 8772**

If your mammogram surveillance plan requires you to have further mammograms you will be contacted by Breast Imaging one year from now. Please contact the Breast Imaging department on **0113 206 4959** if you have any queries about further appointments.

If you have had breast cancer your **Breast Care Nurse** is still available to you on **(0113) 206 8623**.
