The Leeds
Teaching Hospitals
NHS Trust

Radiotherapy

Please note this is only for patients experiencing side effects during or immediately following a course of treatment.

If you have any Radiotherapy related symptoms, such as:

- Unable to eat and drink (**FOR ANY REASON**)
- Coughing/Spluttering when eating **OR** drinking
- Feeling or being sick (vomiting)
- Constipation
- Feeling very unwell
- Uncontrolled Pain
- Worsening shortness of breath/chesty cough
- Temperature 38^c or above
- New or Increasing Confusion

Please let us know as soon as possible, ideally before 11:00am, if you have any of the above symptoms.

Our aim, where possible, is to prevent admission to hospital, therefore contacting us early is important.

*If you are currently having **CHEMORADIOTHERAPY** & have a temperature of **38^c OR ABOVE** and/or feel unwell contact the hospital **IMMEDIATELY** using one of the numbers overleaf.*
