

easy read

hospital

injection

This booklet uses easy words and pictures.

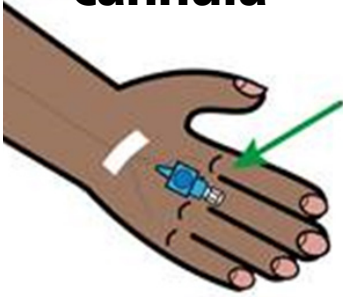

You might want to ask someone to help you read it.

Medical staff might want you to have a cannula in hospital.

They can give you medicine through a cannula.

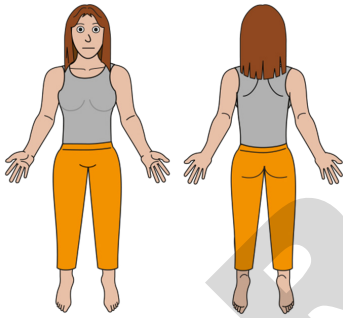

It feels the same as having an injection.

cannula

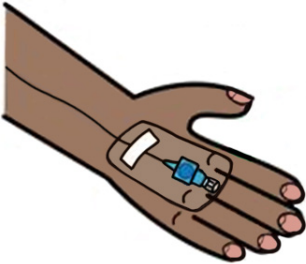

A small tube stays in your hand.

This is so they can give you medicine.

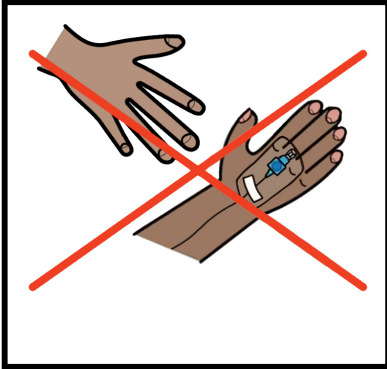

It might be in another part of your body too. That is ok.

dressing

The nurse will put a dressing over the tube.

Do not touch the cannula or line.

Don't pull at the tube, it needs to stay in so you can have medicine through it.

Your nurse will take out the cannula.

You can talk to your nurse about the cannula.

If you have a Learning Disability or Autism diagnosis please complete a Health Passport and return it to the Learning Disability and Autism team on: leedsth-tr.ldautism@nhs.net
