Janice Penny

Nutrition Fellow

Nutrition Nurse Specialists

Nutrition Pharmacists

Trainee Advanced Clinical Practitioner

Nutrition Team Dietitians

Telephone: 0113 2068649 (Monday to Friday 8am - 4pm)

Out of hours contact: 0113 206 9191 (J91)

I am receiving:

- Parenteral nutrition ('yellow'/ 'white' bags)
- Intravenous fluids ('clear' bags)

Other details:

Contact the Leeds Nutrition Team for full prescription details

Telephone number: 0113 206 8649.

I have an intravenous line. I am dependent on this line. Before handling, please wash your hands and use full aseptic technique. Ensure you are competent in dealing with lines in accordance with the Leeds Teaching Hospitals protocol or local line policy. Otherwise, **do not touch my line.**

My line is a:

- Hickman line
- Tunnelled line
- PICC
- Port-a-Cath

Date Inserted:

What is Parenteral Nutrition (PN)?

Parenteral nutrition (PN) is the direct infusion of solutions containing essential nutrients in quantities to meet daily needs of the patient into a vein.

Why is it given?

PN is given to provide nutrition when the gastrointestinal tract is not functioning, or is inaccessible. PN is needed if an individual cannot meet their nutritional and/ or fluid requirements by mouth, or via an enteral feeding tube.

Who administers it?

Competent nurses and patients who have undertaken clinical skills and appropriate training. Healthcare professionals should have the necessary education and competency in the administration of injectable medicines and ANTT (aseptic non-touch technique).

The homecare company I am registered with is:

.....

My HPN regimen details are:

.....
.....
.....
.....
.....
.....

Infection

If I begin to shiver or have a temperature above 38°C, please take **paired cultures (all lumens of central line & peripheral cultures at the same time)**.

Do not remove the central line without consulting the Leeds Nutrition Team on telephone number: 0113 206 8649.

Accurate record of your line infection history should be recorded in the section below so we can identify any trend in infections.

History of my Catheter Related Blood Stream Infection (CRBSI)

Please document on page 7 any history of central line infections.
