

What is Delirium

Information for
patients

**Easy
Read**

easy read

brain

poorly

This booklet uses easy words and pictures.

You might want to ask someone to help you read it.

Delirium is when your brain is acting differently.

It can also be a sign that you are very poorly.

confused

You might be confused.

unhappy

You can become restless and unhappy.

acting differently

You may do things that you wouldn't normally do.

less active

Or you may be less active.

Quiet, sleepy, withdrawn.

trouble talking

You may have trouble talking and getting your words out.

gobbledegook

You may talk about things which do not make sense.

phone family, friends or carer

staff

scared

We will talk to those who support you, and know you well, to help us understand what behaviour is different and why.

We will help you by trying to find out why you are unwell.

We know that this can feel scary.

help

You will be given support and treatment from staff in the hospital.

better

And we will try to get you feeling better.

What did you think of your care?
