

This booklet uses easy words and pictures.

You might want to ask someone to help you read it.

Please read 'How to care for your line' easy read leaflet.

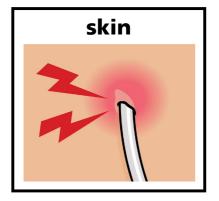

If you notice any changes to your line tell someone.

This leaflets explains who you need to tell depending on what is wrong with the line.

Tell your dialysis team if:

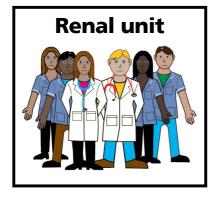

The skin around your dialysis line is painful, swollen, red or has a discharge.

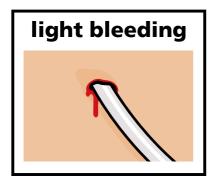

You have fevers or chills.

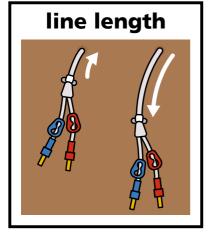

You are generally unwell.

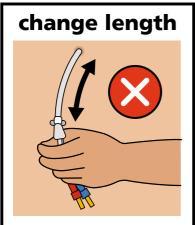

Contact your renal unit if:

There is light bleeding from or around the tube.

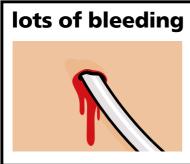

Or your line looks longer or shorter than normal.

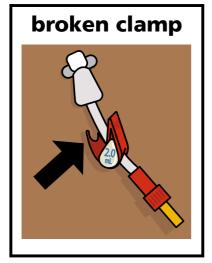

Never push or pull the line to change the length.

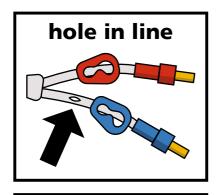

Call 999 and ask for an ambulance if:

 There is a lot of bleeding.

 The clamp has broken or fallen off.

• There is a hole in your line.

• If the skin has broken open over the line.

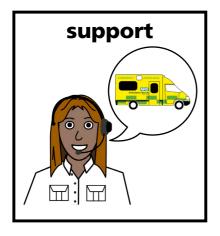

Your line has fallen out.

If this happens, use a clean towel or or item of clothing to apply pressure to the area, and then lie down.

Use dark towels if you have them.

The person answering your 999 call will support you until the paramedic comes.
